Professional Summary

Python Backend Developer with hands-on experience in Django and FastAPI, building scalable backend systems and real-world modules such as RBAC, feature gating, and subscription management. Strong in REST API development, database design, and problem-solving. Passionate about building efficient and reliable backend solutions.

Technical Skills

- **Languages:** Python, JavaScript, PHP.
- **Frameworks & Libraries:** Django, FastAPI,
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, GitHub, VS Code, Excel.
- **Backend Development:** REST APIs, Authentication, CRUD Operations , Data Structures & Algorithms, oop
- **Libraries:** Pandas, NumPy (basic)

Projects

Farmers Assistant App | Django, SQLite, HTML/CSS, JavaScript, APIs [view project](#)

- Developed **crop recommendation** system based on soil & weather conditions.
- Built backend using Django and integrated external APIs
- Integrated **weather forecasting**, rainfall alerts, and dynamic **crop market price updates**.
- Added AI-based **crop disease detection** (image upload) and an **online marketplace** for farmer-buyer connections.

SkillSwap – Time-Based Barter Platform | [view project](#)

Django, WebSockets (Django Channels), SQLite, HTML, CSS, JavaScript

- Built a unique **skill-exchange platform** where users trade time-credits (e.g., 1 hr coding = 1 hr language lesson)
- Designed profile dashboards with skill history, ratings, and transactions.

Disaster Relief System | Django | React.js | REST API | SQLite | HTML | CSS | JavaScript | [view project](#)

- Developed a full-stack disaster management platform enabling users to **report, track, and manage disaster-related help requests** in real time. The system **connects citizens, volunteers, and rescue teams** for faster response and recovery during emergencies.

Experience

ITECHNOPAD, pune- Software Developer Intern

(Dec 2025-present)

Project: StayNMeal-Python, FastAPI, PostgreSQL, React, Maps API

- Developed scalable backend services and **REST APIs** using Python and **FastAPI**.
- Built **subscription, coupon, pricing**, charges, tax, and **feature-gating modules**.
- Developed **Schedule Visit and Callback Request** workflows for both user and admin portals.
- Implemented **RBAC (Role-Based Access Control)** for secure user and admin management.
- Designed and integrated ticketing, feedback, leads, and **support/help center** modules.
- Implemented structured **logging, error handling**, and monitoring mechanisms for production support.
- Developed admin-side pricing rules and **taxation workflows**, including configurable charges and GST-related logic.
- Worked with **PostgreSQL** database design, schema updates, **Alembic migrations**, and data management.
- Built and tested REST APIs for frontend-backend integration and cross-module communication.
- Integrated **map-based location** services with dynamic address updates.

- Developed **duplicate image detection** functionality and backend validation logic.
- Resolved production **bugs, optimized existing features**, and collaborated on application enhancements.
- Used **Git, Docker**, and collaborative development workflows in an Agile environment.

Education

Vishwakarma University Pune

Aug 2023 – Jun 2025

Masters in computer application: CGPA 7.99/10

Pune, Maharashtra

Shivaji University Kolhapur

Aug 2020 – Jun 2023

B.Sc.- Mathematics : CGPA 8.68/10

Achievements & Certifications

[HackerRank](#) Problem Solving Certificate and **4★** in Python.

[codechef](#) -Solved **350+** problems | diamond Badge: Streak Maintainer | Silver Badge: Problem Solving.

[Leetcode](#)-solved **150+** problems|50 days badge|
